

# DepthQ<sup>®</sup>

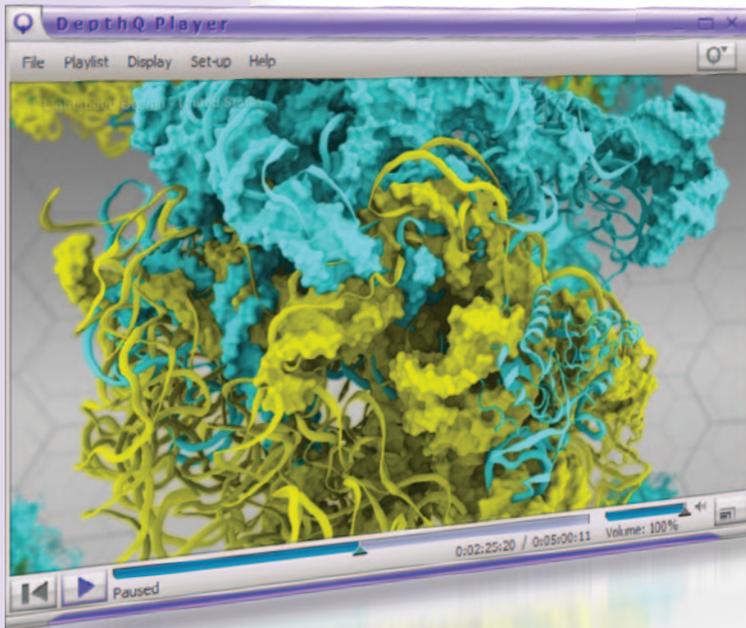

STEREOSCOPIC

## Precision HD 3D

From *Lightspeed* DESIGN

## DepthQ<sup>®</sup> Player™ for Stereoscopic Media

is a feature-packed software solution for the high-quality playback of stereo 3D movies from a standard PC.

*Easy to use and designed from the ground up as a professional product, DepthQ<sup>®</sup> Player™ combines efficient code architecture and superior throughput for flawless high-bandwidth playback of either locally stored or URL-accessible stereoscopic movies, as well as 3D streaming IP video.*

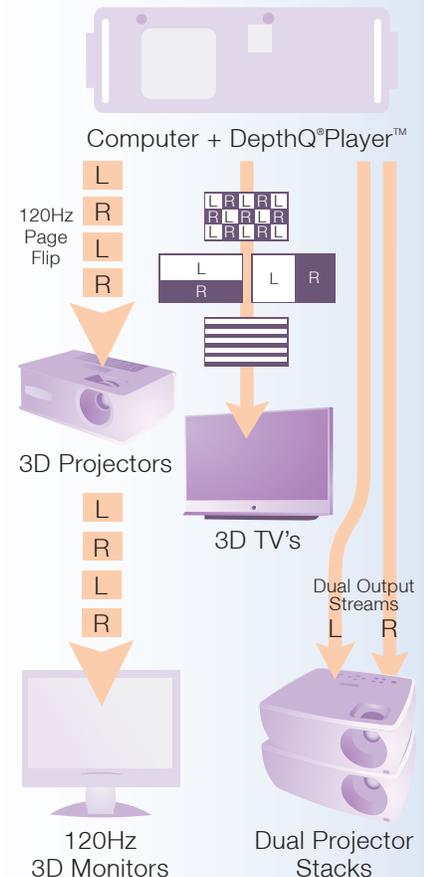

DepthQ<sup>®</sup> Player™ delivers the most comfortable-to-view stereo 3D experience possible, and allows cost-effective viewing of high-resolution stereoscopic media in a wide variety of environments – from remote 3D viewing stations, operating rooms and conference rooms to 3D cinemas, museum exhibits, portable theaters, motion simulators, corporate events and trade shows.

## Configurations

DepthQ<sup>®</sup> Player™ is available in three configurations:

- ☑ **LITE** – A free-to-download fully-functional demonstration version capable of displaying up to 1920x1080 60P\* per eye and beyond. Intended as evaluation software, DepthQ<sup>®</sup> Player™ LITE incorporates a subtle watermark, with modest restricted operation time and playlist functionality.
- ☑ **STANDARD** – A licensed workstation version capable of displaying up to 1280x720 60P per eye specially tuned for the DepthQ<sup>®</sup> HDs3D-1 video projector.
- ☑ **PRO** – A licensed professional version capable of displaying up to 1920x1080 60P\* per eye and beyond, with enhanced feature-set and functionality.

\*Your hardware must be up to the task: High-bandwidth outputs require more powerful CPU's and GPU's.

DepthQ<sup>®</sup> Player™ can display your films in a variety of selectable output 'flavors' in order to drive the many different types of stereoscopic displays available, including the highest-quality stereoscopic format - progressive "page flip" (frame sequential) - at refresh rates up to 120 Hz.

Additionally, DepthQ<sup>®</sup> Player™ supports both single and dual graphics output pipelines.

**NVIDIA<sup>®</sup> 3D Vision™ compatible.**

## Technical Features

- Primary display output: progressive quad-buffered OpenGL frame-sequential “page-flip” (Analog RGB, Digital DVI).  
Optional display output: NVIDIA<sup>®</sup> 3D Vision™ stereoscopic renderer (additional NVIDIA hardware required).
- Supports a variety of data and compression formats: DQ3D\*, H.264/MPEG-4 AVC, MPEG-4, MPEG-2, DV, MJPEG, uncompressed, etc.\*\*
- Supports IP Video streams via Windows Media video and Elecard video.
- Full-featured player interface, including advanced playback controls and playlist support.
- Two operating modes: Basic Mode and password-protected Advanced Mode to ensure advanced configurations remain secure.
- Single pipeline output for active or passive 3D-ready displays and TV's such as single lens DLP<sup>®</sup> stereoscopic projectors, CRTs, plasma screens, LCD monitors and rear-projection DLP<sup>®</sup> monitors.
- Dual pipeline output for passive displays based on stacked video projectors, LCD or DLP<sup>®</sup> (nVidia<sup>®</sup> Quadro graphics card required).
- Both Full-Screen and Windowed stereoscopic display mode support in OpenGL mode (nVidia<sup>®</sup> 3D Vision™ is full screen only).
- Real-time zero parallax plane adjustments (vertical and horizontal).
- Savable presets allow your parallax plane adjustments (and other attributes like Volume, Aspect Ratio and Time Code events) to save with each movie as an associated DepthQ<sup>®</sup> Config (.DQC) file. Movies then self-correct when .DQC is present.
- Support for advanced multi-channel sound: Dolby Digital<sup>®</sup> 5.1 channel Sampling frequency:44,100-48,000 kHz.  
Digital AES/EBU Analog XLR (third party audio decoder required).
- Supports a wide variety of stereoscopic media input formats: above/below, above/below for sync-doubling (with adjustable separation), relaxed or cross-eye (Side by Side), interlaced, Tri-Delta, SIS, tiled autostereoscopic‡, etc.
- Support for still stereoscopic image visualization (JPG, BMP).
- On-the-fly conversion of interlaced NTSC/PAL TV-formatted stereoscopic DVD or MPEG-2 data to any supported output display format at playback (Must be ripped from DVD prior to playback).
- Support for real-time GPU pixel-shading via Cg code (PRO & LITE only).
- DMX512 – supports an outgoing DMX control stream (requires a compatible USB to DMX adapter) (PRO & LITE only).
- Realtime Cornerstone Manipulation – Allows precise independent left and right eye adjustment , especially for combining two video projectors – (like a digital lens shift + geometric correction for each eye) (PRO & LITE only).

## New Features!

- Left Right Movie: Ability to load separate Left and Right movie files as a stereo pair.
- Fade Setup: Allows user-controlled, timed fade-ups and fade-downs.
- DCP support. A non-watermarked version of the Jpeg2000 Decoder, the playback standard for Digital Cinema, is now available for DepthQ<sup>®</sup>Player™ PRO for an additional cost (playback speed and quality depends on the speed and quality of your computer).
- Movie Time Code Editor: New Automation Functions include pre-programmed, time-based adjustments of IN/OUT points, parallax offsets, pause and volume within a movie using internal time code (PRO & LITE only).
- Cg parameters now saved in movie-specific configuration files, allowing each movie to utilize independent Cg code selection and parameter adjustments (PRO & LITE only).
- Ability to generate configuration files for Girder, a third party automation software package (PRO & LITE only).

\* The DQ3D codec is only provided with the purchase of DepthQ<sup>®</sup>Capture™, and is fully compatible with DepthQ<sup>®</sup>Player™.

\*\* Some formats require the purchase of a third-party codec.

‡ Autostereoscopic support not included with basic package.

## Pricing

**DepthQ<sup>®</sup>Player™ LITE:** *Evaluation License - Free Download*

**DepthQ<sup>®</sup>Player™ STANDARD:** *Workstation, limited to 10 viewers - \$395*

**DepthQ<sup>®</sup>Player™ PRO:** *Workstation, limited to 10 viewers - \$995*

**DepthQ<sup>®</sup>Player™ PRO:** *Commercial Theater, unlimited viewers - \$1995*
